Lymphatic Body Massage

Properly working lymph nodes, allowing the proper flow of lymphatic liquid, form the basis of our immune system. Every lymph node is a purification treatment center detoxifying the lymph fluids as they move through.

Lymphatic drainage massage is a gentle, rhythmic massage technique designed specifically to accelerate the normal functioning of the lymphatic system. It aids the body in ridding itself of toxins, helps decrease pain, and cleanses the tissue of inflammation, edemas, sinusitis, acne, migraines and more. It is considered beneficial for conditions such as fibro-myalgia, multiple sclerosis, and neuromuscular disorders.

Lymphatic drainage is inappropriate when there is active infection with fever, untreated cancer, thrombosis or congestive heart failure.

It's a wonderful stress reducer and immune system support, while helping the body detoxify!

LED Light therapy – Anti Aging

Light Therapy has been used in the medical profession for over 60 years. Diodes speed up the cellular metabolic process, which in turn activates the cells to produce more ATP. ATP is the fuel our skin needs for healing and collagen production. LED light is less concentrated than the pinpoint of light in a laser, is dispersed more evenly and it can be used for a longer period to stimulate the growth of collagen.

This non-invasive treatment using the Red Light helps reduce fine lines and wrinkles, age spots, sun damage, overall redness, flushing, dilated capillaries and other conditions found with Rosacea. It has no side effects, no pain and is safe and effective for all skin types.

Treatments include cleansing, a light peel, a nourishing ampoule and an appropriate "treatment crème" containing DAME Alpha Lipoic and combinations of antioxidants and enzymes to assist your new youthful look.

Bio-Hydroderm

Bio-Hydroderm is an amazing new treatment! You will love the results! Diamond head microdermabrasion meets vacuum massage with intense hydration. Great for all skin types, The Biohydroderm comes with two special Aquafuse infusion serums focusing on acne and age management. It helps reduce the appearance of fine lines, acne scars, and hyperpigmentation through a more gentle and effective system than crystal microdermabrasion

LED Light Therapy for Acne

Blue Light –The new way to treat acne!

This non-invasive treatment is an alternative to medications such as Acutane or oral antibiotics, and is FDA approved. Dramatic and quick results can be seen faster and more effective than most topical treatments. Besides helping to reduce the appearance of acne scars and enlarged pores, LED therapy helps to eliminate blackheads and pimples while improving circulation and promoting healthy skin. Treatments include cleansing, a light peel, a nourishing ampoule and an appropriate "treatment crème" application before administering the Light Treatment.

Steamy Wonder

This is an aromatherapy steam treatment administered in a private body canopy. Calming, aromatic oils are applied as steam is used to stimulate the immune system and encourage the elimination of impurities. A steam treatment also enhances acute pain relief massages, making them far more effective and safer than non-prescription painkillers. (30 Minutes)
